Have you ever felt down or depressed?

Want to learn about how you can use your mind to prevent depression?

The Pediatric Mood Disorders Program at the University of Illinois at Chicago is conducting a research study examining whether or not helping teenagers learn ways to use their attention and retrain their brains to make depression less likely.

Are you 12 – 18 years old? Have NO braces?
You may be eligible for our study!

During this study you will:

- Get a brain scan
- Answer questions about your mood and behavior
- Possibility of 8 weekly treatment sessions
- Carefully monitor your depression

*If you qualify, we will compensate you for your time
